

Hit the Box

Learning values

- Developing gross motor skills
- Throwing
- Counting from 1-20

Recommended materials

- 9020 LEGO® Soft Starter Set

Vocabulary

Encourage the use of these words during the activity:

- Throw
- Hit
- Land
- Score
- Points
- Add up

Activity

It is time for the annual outdoor Activity Day at the day-care centre. All the children and their parents are to take part in the fun that has been planned.

One activity involves throwing a LEGO Soft brick and trying to make it land inside one of three different-sized boxes. Unfortunately, the boxes have disappeared. Help the day-care centre by building some new boxes out of LEGO Soft bricks. They need to be in three different sizes.

Then play the game, allowing each player to throw a LEGO Soft brick and see which box you hit! Practice for a while!

The competitors score points depending on the size of the box they hit: the smaller the box, the higher number of points scored. Each participant is given five LEGO Soft bricks. Throw one at a time and add up the points for each hit in a box. The winner is the one with the highest score!
