

LEGO® Education and the LEGO Group have created new innovative elements for the LEGO System in Play, which will be first seen with LEGO Education SPIKE™ Prime.

Integrator Brick

(with cross axel)
Allows for building together with both the LEGO Technic and LEGO system platforms, further expanding systematic creativity and limitless building possibilities

Technic Frames

Quick prototyping, faster and bigger builds

New Wheel Design

Increased manoeuvrability, precision and ease of attachment

Ball and Castor

Specialised caster wheel element for driving models and builds

Biscuit

Enhanced stability, multi-direction creation

Wire Clip

Keeps all wires in check

Technic Base Plate

Quick prototyping, faster and bigger builds

Gear

Completes the bevel gear family and makes new sets of angle gearing possible
